

Hellfly
BALLISTIC SUNGLASSES®

REVISION®

Revision's Hellfly Ballistic Sunglasses perform double duty: protecting your eyes from unexpected fragments and environmental elements both on the job and off.

Military level impact protection

Low profile wrap-around fit

Weightless comfort

*Also available in Polarized
and Photochromic*

FEATURING HIGH IMPACT LENSES, the Hellfly Sunglasses fuse the demand for sleek, comfortable eyewear with unrivaled sunglass-style ballistic protection. The Hellfly features flawless optics, wrap-around frames and Revision's commitment to the highest level of quality.

KEY FEATURES

OPTICS DESIGN — 2.2 mm thick lenses made of high impact, optical grade polycarbonate ensure visual clarity

UV PROTECTION — 100% protection from harmful UV-A, UV-B and UV-C rays

WRAP-AROUND — Wrap-around design with wide field-of-view protects from light, wind and unexpected fragments

FIT — Comfortable fit contours to face; overmolded temples keep eyewear in place; adjustable nosepiece for customized fit

DESIGN — Low profile and streamlined ergonomic design provides comfort for all

TOUGH — Durable material resistant to chemicals, moisture and extreme temperatures; lens hard coated for maximum scratch resistance

LIGHTWEIGHT — At 1¼ oz. (35g) Hellfly Sunglasses are lightweight and comfortable

OPTIONAL COLORS — A variety of frame and lens color options available

THE HELFLY BALLISTIC SUNGLASSES OFFER EXTREME PROTECTION FOR THOSE WHO PUSH THE LIMITS

- Compliant with ANSI Z87.1 Standard
- Exceeds U.S. military eyewear ballistic impact resistance requirements: MIL-PRF-31013, clause 3.5.1.1 (excluding polarized)
- Exceeds EN 166 ballistic impact requirements

DON'T RISK YOUR EYESIGHT – OVER 90% OF EYE INJURIES ARE PREVENTABLE

Whether you're on or off duty, the Hellfly Ballistic Sunglasses offer essential protection from unexpected fragments and environmental elements. Exceeding stringent impact resistance requirements and optical tests, the Hellfly Sunglasses provide military level impact protection and perfect optics. Hellfly Sunglass lenses offer 100% UV A-B-C protection.

WHAT ARE THE U.S. MILITARY EYEWEAR BALLISTIC IMPACT REQUIREMENTS?

In order to pass the U.S. Military ballistic impact resistance requirements, Hellfly Sunglasses must pass the stringent test protocol (MIL-PRF-31013, clause 3.5.1.1). This rigorous test subjects the Hellfly Sunglasses to a 0.15 caliber, 5.8 grain, T37 shaped projectile which impacts the eyewear at 640 to 660 feet per second. The Hellfly Sunglasses (excluding polarized) will exceed the ballistic standard and the wrap-around design ensures that the wearer is fully protected against unexpected fragments and extreme conditions.

HIGH-IMPACT OPTICALLY CORRECT LENSES

Reduce reflections and provide sharp contrast.

CLEAR	LT* = 93%	Provides maximum light transmission for use as an indoor or general purpose lens
SMOKE	LT* = 24%	Offers superior clarity in sunlight; ideal for sports, driving and leisure wear
MIDNIGHT MIRROR	LT* = 16%	Reduces extreme glare and squinting; ideal in bright sunshine
OCEAN MIRROR	LT* = 16%	Provides high contrast in bright and overcast conditions
FLAME MIRROR	LT* = 18%	Provides extreme glare reduction with high definition; ideal for outdoor activities
POLARIZED	LT* = 12%	Provides minimal light transmittance while reducing surface reflections and glare
PHOTOCHROMIC	LT* values range from 18-80%;	automatically adjusts to light conditions to provide a clear lens in low/overcast light and a solar tint in bright, sunlit conditions

* LT (Luminous Transmittance) is the amount of light which is transmitted through the lens. All values are measured as per the MIL-PRF-31013 standard.
